

Port Reception Facility Information

Facility for Discharge of Ship generated waste

Vessels have to discharge ship generated waste (Like sludge, Slop, Garbage, scrap etc.), which are generated during voyage period, at any port of call. Disposal of ship generated waste into sea water is strictly prohibited as per MARPOL 73/78 convention as amended. India is signatory to this convention of IMO (International Maritime Organisation). For collection and disposal of ship generated waste, as per MARPOL 73/78, it has been made compulsory for all the countries, who are signatory to IMO, to provide shore reception facility. Accordingly, Dhamra Port provides this facility to vessels calling at this port through the private firms registered with Central Pollution Control Board and having valid approval to operate from State Pollution Control Board. These private registered firms make the necessary arrangement for discharge / reception of the ship generated waste from the vessel.
